

Effective Rodent Control with Storm[®]

Problems Caused by Rodents

Electrical damage caused by chewing through wiring - short circuits, power outage, fire hazards

Food contamination via urine/feces or chewing on food or packaging, carrying pathogens

Disease Transmission (Leptospirosis, Salmonellosis, Hantavirus) - poses serious health risk

Customer dissatisfaction, amaged reputation, negative review, loss of business

How to Choose Effective Baits

Highly palatable to rats and mice

Single feed; sure kill in 3-7 days

Weather-resistant; wax-based with anti-mold

Proven Efficacy for rapid results

Storm[®] Wax Block Bait Advantages

Highly potent and palatable
Single-feed tethal dose
Controls Warfarin and Coumatetralyl-resistant rodents
Durable wax block bait

✓ Tamper-resistant when Used in Bait Stations

Comparison vs. First-Generation Anticoagulants (Multi-feed)

Kills rodents 5-10 times faster

Rodents consume less bait

Decreased risk of bait shyness

Bait Placement Examples

Residential Properties Warehouses

Food & Beverage Facilities

Livestock Operations
